General summary for 1913 161

PART I.

WORK OF THE BUREAU DURING THE FISCAL YEAR ENDED JUNE 30, 1913.

WORK OF THE WEATHER BUREAU DURING THE FISCAL YEAR ENDED JUNE 30, 1913.

I. GENERAL.

(*a*) **Barocyclonometer for use in North Atlantic.**—In March, 1912, the Director of the Weather Bureau had a very severe illness and was ordered by his physician to take a prolonged rest, and so, with the object of recuperating his health, he sailed for Europe on May 3, 1912. Before leaving he had received a communication from the Bureau of Navigation, Navy Department, Washington, D. C., inquiring what modifications might be necessary in order to adapt his barocyclonometer for use in the North Atlantic, and, as during the voyage to Europe his health recovered sufficiently to enable him to work on the project, he determined to spend his leave of absence in making the necessary changes in the instrument. With this object, therefore, he made a flying visit to London to consult the constructor and obtain specifications, for he was desirous of having an instrument as perfect as possible but at a low cost. From London he journied to the Belen Observatory, Havana, Cuba, whose records of the hurricanes of the West Indies are the most complete extant. There he spent a month studying these records till finally he had all the data complete for the modifications necessary to make the barocyclonometer serviceable for use in the North Atlantic. He then proceeded to Washington, D. C., to talk the matter over with the officials of the Navy Department and Weather Bureau, who showed him every attention, and in a short time all arrangements were finished, and the barocyclonometer was officially adopted by the Navy Department for use on all the warships of the North Atlantic Squadron.

As it was impossible to have the instrument made in America, he returned again to London where a contract was made with Henry Hughes & Son, of Fenchurch Street, for the construction of the instrument, and before he left England he was able to see a model of the new barocyclonometer, which is now for sale by the constructors.

(*b*) **Visit of Sir Henry May, governor of Hongkong.**—On July 1, 1912, the Observatory was honored by a visit of Sir Henry May, the newly appointed governor of Hongkong. Among other things, he showed himself very solicitous concerning the erection of a wireless station at Santo Domingo, which had been asked for in vain by his predecessors in office from Governor-General Smith, whose proposal for the erection of the said station was rejected by the Assembly.

II. MANILA CENTRAL OBSERVATORY.

1. WORK OF THE CENTRAL OBSERVATORY.

(*a*) **Meteorological department.**—As it was thought advisable to make the daily weather map as public as possible, an arrangement was arrived at by which copies are now exposed in the Ayuntamiento, the custom house, and Fort Santiago. A copy was also offered to the manager of the Manila Hotel, but as no answer was received the maps have not been sent.

The typhoon season of 1912 was remarkable both for the number and the severity of the typhoons that struck the Islands, especially toward the close of the year. The number during September was four, though this number is not extraordinary for that is the general average of these storms during September. October, however, was remarkable in that there were also four, and one of them was of great severity. On October 19, an account was received in Manila of a destructive typhoon in the Visayas and the reports of the damage done in Cebu were of so alarming a character that the Government hurried a relief expedition to that Island with all kind of supplies in order to help the stricken people. Father Saderra, who was Acting Director of the Weather Bureau in the absence of the Director, at once set out for the district to investigate the effects of the typhoon. It was found that though the storm had been very severe in Cebu and had caused the loss of from 350 to 400 lives, nevertheless, this was due not so much to the force of the winds as to the floods caused by the extraordinary torrential rains that accompanied the vortex, for the greater number of the fatalities were due to drowning. Another factor that helped to swell the list of disaster was the fact that, Cebu being generally immune from typhoons, the people paid but little attention to the warnings sent by the Observatory to the town.

November was also a month of unusual typhoons, the Visayans being again the greatest sufferers.

During the year an innovation was introduced in the manner of disseminating typhoon warnings. As these warnings are of great importance to the shipping firms, they were sent directly to the different firms of Manila by messenger, so that they could advise their own vessels in the different ports of the Islands of the threatened danger. As this service has been greatly appreciated, it will be continued in future.

An arrangement was also made with the Chief Signal Officer, by which warnings could be sent into the air by the radio station at Corregidor, so that all vessels equipped with wireless telegraph apparatus could pick up the warnings while out at sea. This ought to be an incentive to the owners of the interisland steamers to equip their vessels with the necessary apparatus.

At the request of General Pershing a set of typhoon signals was sent to Zamboanga, and the necessary warnings are now sent regularly to that port.

The number of typhoon warnings cabled to foreign observatories was 131 as against 122 during the preceding year.

The number of barometers compared and corrected was 299, an increase of 96 compared with last year.

(*b*) **Astronomical department.**—The time-signal service for Manila and the provinces was continued as heretofore and for this purpose 450 star transits were observed. Observations of circumpolar stars were also made on several occasions during the year for the purpose of checking the instrumental constants.

The number of chronometers rated was 34 as against 29 during the fiscal year 1912 and 41 during 1911.

Several vessels of the United States Navy and Japanese Navy anchored at Guam requested the correct time to be sent by cable to that island and on each occasion the request was complied with. When the proposed international time and weather radiotelegraphic signals with its stations for the Far East in Manila are in complete working order, this work will be avoided, for then the correct time will be sent into the air regularly every day at a fixed hour so that all ships with wireless apparatus will be able to set their chronometers without the necessity of coming to port.

Observations of the solar radiation were made on every available day by means of the Angstrom pyrheliometer—from February 16 to May 5, at Mirador Observatory, Baguio, and during the rest of the year in Manila. The object of this change of place was to obtain a comparison between the solar radiation in a large city at sea level and in a fairly isolated spot at a height of 1,500 meters. The number of observations made in Manila was 500 and in Baguio 260. It is proposed to make a series of simultaneous observations in these two places and a second pyrheliometer exactly similar to the one in use was ordered some four months ago from the constructor Rose of Upsala.

Since the beginning of January, daily observations have been made with the Wilson radio-integrator, an instrument which measures by means of the evaporation of alcohol the number of calories emitted by the sun during the day on the place where the instrument is installed. A second of these instruments has just been installed on Mount Mirador.

A new civil time chronometer provided with electric contacts has been purchased from the well-known firm, Dent, of London. This chronometer will be employed in sending the correct time to Guam, for when the chronometer is introduced into the circuit it transmits the seconds automatically without the intervention of the telegraph operator.

(*c*) **Seismic department.**—The work of this department was increased during the year by the opening of the seismic station at Ambulong, a small barrio situated on the NE shore of Lake Bombon.

The special object of this station is to facilitate the study of the Taal Volcano, to help in the observation of the periods of its activity, so as to prevent as far as possible the loss of life that occurred during the eruption of 1911. It was for this purpose that the Legislative Assembly of 1912 appropriated the sum of ₱18,000, which money was to be expended in the acquiring of a suitable plot of ground and the erecting and equipping of a complete seismic observatory. A motor launch was also to be obtained with the triple object of visiting the volcano and examining its state of activity or dormancy, of warning the towns around the lake in case of danger, and finally of serving as a means of transportation to those desiring to see the volcano.

The station, which is built of reinforced concrete was completed toward the end of June, 1912. The full equipment of seismographs and other instruments did not arrive till the end of the year 1912, but by the middle of January of the following year, 1913, they had been installed and were in perfect working order.

The equipment consists of a Vicentini microseismograph and an Agamemnone seismograph, a mareograph or self-recording tide gauge, deep-sea thermometers for the measurement of the temperature of the water of the lake and the subsoil of the volcano island, and a full complement of meteorological instruments, both self-recording and direct reading. A first-class telescope of 3½ inches aperture was also purchased for the station with private funds.

The launch was transferred to the lake in March of this year and carried its first tourist passengers to the volcano on April 1. A visit to the volcano is so interesting that many tourists would make the journey were it not for the truly execrable trail, misnamed road, from Tanauan to Ambulong. If the road were in good repair the journey could be made from Manila in one day, though, as matters are, most people prefer to stay a night at the observatory, and for this purpose four camp beds were purchased for the accommodation of such visitors. Of course, there is no hotel of any kind in the neighborhood of Ambulong and thus visitors must take their own provisions with them, the only thing that the station can provide being an abundance of excellent water.

Later on it was found necessary to build a short pier and a boathouse for the proper care of the launch, and for this and for a few other small pieces of necessary work a sum of ₱1,000 was appropriated by the Assembly.

The personnel of the station consists of an observer, a mechanic who is also engineer of the launch, and a general helper who acts as helmsman of the launch.

Since the time the seismological instruments were installed there has reigned the most absolute seismic calm and the volcano itself has been quite dormant.

The fiscal year of 1913 must be considered as one of great seismic activity in the Philippines, for of the 396 disturbances registered by the seismographs, no less than 254, or 64 per cent pertain to earthquakes of more or less importance which originated in or very near to the Archipelago, 135 to earthquakes at a distance of from 1,000 to 5,000 kilometers, and 7 to earthquakes which originated at more than 5,000 kilometers distant, among them being included the great Turkish earthquake and two in Alaska. The number of earthquakes felt in different regions of the Philippines during the year, excluding, however, two seismic periods in Mindanao mentioned below, amounts to 171.

On November 8, 1912, the Province of Sorsogon was the scene of a destructive earthquake of small extension, which happily did not cause any fatalities. The towns damaged by the shock were Sorsogon (the capital), where a great number of buildings were ruined, and Gubat. In this latter town the church, the presidencia, and the central school were the most to suffer. It would be very interesting to have more details of the construction of the school building so as to be able to determine more accurately the power of resistance afforded by reinforced-concrete buildings to earthquake shocks, for according to the reports to hand the school was built of blocks of concrete jointed together by iron bars, while the portico was of reinforced concrete, and yet in both walls and portico numerous cracks were opened up by the force of the shock.

As in previous years so also in this, the eastern portion of Mindanao was afflicted by a great number of severe earthquakes. On March 14, 1913, there occurred in the district of Davao, Cotabato, and the Agusan, an earthquake of exceeding great amplitude which lasted for the extraordinary long time of two minutes or more, and yet owing to the slowness of the oscillations practically no damage was done to either life or property. Later reports made it evident that the epicenter of the earthquake was further south than Mindanao in the Islands of Siao, Sangir, and Talaut, where it caused great ruin and the loss of many lives. As the northern part of the Agusan Valley is some 500 kilometers distant from the epicenter, it follows that this earthquake was one of the greatest and most extensive known, for the isoseismal VII–VIII very probably comprehended a prolonged area from N to S of more than 1,000 kilometers in length. Fortunately, however, the great part of this area was in the sea and hence we may conclude that it did not cause more fatalities than those reported from Siao, Sangir, and Talaut.

A month after this earthquake the inhabitants of Surigao and the Agusan Valley passed through a seismic period which was capable of striking terror to the most stout-hearted. From the 18th to the 30th of April a series of earthquakes was felt of various intensity, though none of them passed VI–VII of the Rossi-Forel scale, and consequently no very serious damage was done. During this period of twelve days, 84 shocks were felt in Butuan and 63 in Surigao, while the just perceptible shocks were said to be innumerable, especially on the 24th when 25 were counted in Surigao and the same number in Butuan on the 26th. After the 30th they ceased almost completely in Surigao, and a little more slowly in Butuan.

The publication of the Seismological Bulletin has been continued and it is greatly appreciated by seismologists as may be seen from the increased number of correspondents from seismic observatories who have asked for it.

Besides the Monthly Bulletin, in which an account is given of the earthquakes felt in the Philippines during the month, there was published during the year a "Catalogue of Philippine Earthquakes" which will be used as part of the general catalogue given out by the Comité International de Seismologie.

The following studies were also published in the Monthly Bulletin of the Weather Bureau:

The Sorsogon Earthquake.
The Earthquake in Siao, Sangir, Talaut, and Mindanao.
Seismic Period of the NE of Mindanao.

There is also in the press a paper on the relation between earthquakes and the geology of the Philippines prepared by the chief of the seismic department in collaboration with the chief of the division of mines of the Bureau of Science.

(*d*) **Magnetic department.**—The ordinary routine observations of the variation and absolute measures of the magnetic elements have been continued during the year.

The quarterly report of magnetic calm days has been sent regularly to the chief of the magnetic service of De Bilt, Holland, to be included in the Bulletin of Magnetism published by the permanent commission of terrestrial magnetism. Photographic copies of our curves of the greater magnetic storms have also been forwarded to the same commission.

No progress has been made in the work of tabulating the observations made during the two preceding years owing to the non arrival of the correction coefficients of our instruments which are being calculated in the magnetic department of the Carnegie Institution of Washington.

During the year the magnetic observatory at Antipolo was visited by three parties from the Bureau of the Coast and Geodetic Survey of Manila and Washington with the object of making absolute observations and comparing their instruments.

2. IMPROVEMENTS.

The observatory purchased with private funds quite a large number of instruments during the year, especially for the magnetic service and the work of solar physics. New magnets for the Dip circle were obtained from the famous maker, Dover of Charleston, Kent, and new collimator magnets were ordered from Elliot Bros., London.

Two Wilson radio-integrators and a new Angstrom pyrheliometer were obtained, and a Callendar radiation receiver with electric recorder were ordered for the better equipment of the solar physics section of the astronomical department.

Many new books on radiation and analogous subjects, on meteorology, and astronomy were also purchased with private funds for the library, which has been used frequently by the professors of the Philippine University and the Bureau of Science.

III. SECONDARY STATIONS.

(*a*) **Change of stations.**—After a certain amount of correspondence and trouble the meteorological stations at Iloilo and Cebu were transferred from their old positions to provincial building, Iloilo, and to the new custom house, Cebu, respectively, and the outcome has been very satisfactory.

At the suggestion of Mr. Helm, Director of Navigation, the station at Laoang was transferred to the lighthouse on Batag Island, Samar. The position is a perfect one for the observation of the state of the sea in the Pacific and the direction of the swell which is of such importance in the prediction of typhoons. The occasion of the change was the construction of a telephone line between Batag and Laoang, which thus makes communication with the mainland an easy matter. The lighthouse keeper is the observer and in order to fit himself for the work he was authorized to come to the observatory for the necessary instruction.

(*b*) **Stations of the Weather Bureau.**—Hence on June 30, 1913, the Weather Bureau maintained the following stations:

One branch observatory at Baguio; one magnetic observatory at Antipolo; one seismic and geophysic station at Ambulong, Taal; 7 first-class stations, 10 second-class, 25 third-class, and 9 rain stations.

IV. PERSONNEL.

(*a*) **General.**—The composition of the personnel of the Weather Bureau as to nationality has remained practically unchanged, over 91 per cent being Filipinos.

(*b*) **Changes.**—Reverend Father Zwack was forced by ill-health to hand in his resignation, his place being taken by Reverend Father Brown.

The number of separations from the service was 11, and the appoinments 14, the 3 extra employees being appointed to the new seismic station at Ambulong.

(*c*) **Separations.**—The employees who left the meteorological service were one secretary, resigned; one first-class observer, resigned on request; one assistant observer, resigned to take up the practice of law; two assistant observers, resigned; one Class III observer, resigned to enter telegraph school; one rain observer, resigned; two messengers, discharged, two resigned.

(*d*) **Appointments.**—The vacancies created by the separations were filled partly by promotions and reinstatements, the rest by appointment.

(*e*) **Promotions.**—There were in all 21 promotions:

	From—	To—		From—	To—
3 observers	₱1,920	₱1,980	2 telegraph operators	₱840	₱960
1 observer	1,800	1,860	1 assistant calculator to assistant observer	720	960
1 assistant observer	1,320	1,560	2 second-class observers	600	720
1 calculator	1,440	1,560	2 third-class to second-class observers	360	600
2 assistant observers	1,200	1,320	2 third-class observers to assistant calculators	360	600
1 draftsman	960	1,080	2 assistant observers to Class III observers	200	360
1 assistant calculator to Class I observer	720	1,200	1 rain observer to Class III observer	180	360

V. PUBLICATIONS.

Special publications.—Three reprints from the monthly Bulletins of September, October, and November, containing discussions of the more important typhoons of these months were published by Rev. José Coronas, who also published a study entitled "The Extraordinary Drought in the Philippines, October, 1911, to May, 1912."

The director published a pamphlet on "The Barocyclonometer for use in the North Atlantic."

PART II.

HOURLY METEOROLOGICAL OBSERVATIONS MADE AT THE CENTRAL OBSERVATORY DURING THE CALENDAR YEAR 1913.

INTRODUCTION.

Part II of our report for 1913 contains the meteorological observations made during the year at the Central Observatory at Manila. The hours of observations are given in Insular standard time—that is, in the time of the one hundred and twentieth meridian east of Greenwich, adopted by order of the United States Government on September 6, 1899. It is to be noted that the observations of atmospheric pressure, temperature, relative humidity, vapor tension, and the direction and force of the wind are hourly, read directly between the hours 6 a. m. and 7 p. m., while for the hours from 8 p. m. to 5 a. m. they are taken from self-registering apparatus. The hourly observations of the direction, form, and amount of clouds are made from 7 a. m. until 6 p. m. only.

Each of the tables of hourly observations shows also the respective hourly, daily, and monthly means. The extreme daily values of the various elements, together with the time of their occurrence, are united into a separate table. The thermometers and admidometer are placed in the observatory park 1.5 meters above the ground.

The readings of the barometer have not been corrected for gravity; this correction would be —1.72 mm.

All observations contained in this report are expressed in the metric system, continuing the practice adopted at the time of the reorganization of the Weather Bureau. As in former reports, we have arranged the observations according to month.

EXPLANATION OF SYMBOLS (BEAUFORT'S LETTERS AND INTERNATIONAL WEATHER SYMBOLS).

Symbol.	Equal to—	Symbol.	Equal to—
Ci.	Cirrus.	o	Overcast.
Ci.-S.	Cirro-stratus.	p	Passing showers of rain.
Ci.-Cu.	Cirro-cumulus.	q	Squally.
A.-Cu.	Alto-cumulus.	u	Ugly or threatening weather.
A.-S.	Alto-stratus.	v	Visibility of distant objects.
S.-Cu.	Strato-cumulus.	w	Wet or heavy dew.
N.	Nimbus.	●	Rain.
Cu.	Cumulus.	≡	Fog or mist.
Cu.-N.	Cumulo-nimbus.	⌓	Dew.
S.	Stratus.	⊕	Solar corona.
Fr.-Cu.	Fracto-cumulus.	○	Solar halo.
Fr.-N.	Fracto-nimbus.	◒	Lunar corona.
Fr.-S.	Fracto-stratus.	◡	Lunar halo.
S.-cf.	Stratus-cumuliformis.	☇	Lightning.
N.-cf.	Nimbus-cumuliformis.	☈	Thunderstorm.
M.-Cu.	Mammato-cumulus.	⊤	Thunder.
b	Clear, blue sky.	↙	Strong wind.
c	Partial clouds.	⌒	Rainbow.
d	Drizzling or light rain.	∞	Dust haze.
g	Gloomy, or dark, stormy-looking weather.		

NOTE.—The intensity of any individual phenomenon may be distinguished by the figures ^{0} and ^{2}, which should be used as exponents of the symbols, so that ^{0} indicates slight, and ^{2} strong; e. g., ●^{0}=slight rain, ●^{2}=heavy rain. Figures in heavier type represent extreme values.

DAILY GENERAL REMARKS.

1----● almost all day long.
2----● in the early morning.
3----Overcast.
4----Do.
5----d° 11.50 a., 1.20 p.
6----● in the early morning.
7----Cloudy weather.
8----Overcast.
9----Do.
10----●° in the forenoon and afternoon.
11----d° in the morning and afternoon; ⊤ ENE in the afternoon.
12----d° in the afternoon.
13----Cloudy weather.
14----Do.
15----Do.
16----Fair weather.
17----●° in the morning.
18----Somewhat gusty WNW winds in the afternoon; coloration of upper clouds at sunset.
19----Cloudy weather.
20----Fair weather.
21----Cloudy weather.
22----Do.
23----Do.
24----● in the forenoon and afternoon.
25----● in the afternoon and night.
26----Somewhat gusty NNE winds in the evening.
27----Cloudy weather.
28----Do.
29----● in the afternoon.
30----Overcast.
31----Somewhat gusty Ely winds in the afternoon.

DAILY GENERAL REMARKS.

1----Gusty SEly winds in the afternoon.
2----Cloudy weather.
3----Do.
4----Somewhat gusty SE winds in the afternoon.
5----Cloudy weather.
6----Overcast.
7----Cloudy weather.
8----Somewhat gusty SE winds in the afternoon.
9----Gusty SE winds in the afternoon.
10----Somewhat gusty SE winds in the afternoon.
11----Fair weather.
12----≡° a; d° in the afternoon.
13----⛈ N quadrant in the afternoon.
14----Heavy thundershowers in the afternoon.
15----⛈ N, E in the afternoon; ⛈ N, ⚡ various points in the evening, with occasional ● at night.
16----d° in the morning; ⊤° E 0.55 p.
17----⛈° NE quadrant, d° in the afternoon.
18----⛈ different points in the afternoon, with occasional ●.
19----Heavy thundershowers in the afternoon.
20----Cloudy weather.
21----As yesterday.
22----Somewhat gusty SSE winds in the afternoon.
23----Cloudy weather.
24----Somewhat gusty Ely winds in the afternoon.
25----d°, somewhat gusty SEly winds in the afternoon.
26----Somewhat gusty SEly winds in the afternoon.
27----Radiation of Cirrus toward S, ○° in the morning.
28----Cloudy weather.
29----Somewhat gusty Ely winds in the afternoon.
30----Somewhat gusty SEly winds in the afternoon.

OBSERVATIONS FOR MAY, 1913.

DAILY GENERAL REMARKS.

1----Cloudy weather.
2----●° in the afternoon.
3----Gusty SE winds, ⌒, d°, in the evening.
4----≡° in the morning.
5----⚡ NW in the evening.
6----●° in the morning and at night; gusty Nly winds in the afternoon.
7----●° in the early morning; d in the morning and afternoon, somewhat gusty NNE winds veering gradualy to ESE.
8----Somewhat gusty SE winds in the morning; ⛈ ESE, N in the afternoon; ● in the afternoon and night.
9----●°, somewhat gusty SSW winds in the morning and afternoon.
10----● in the early morning; somewhat gusty SWly winds in the forenoon and afternoon.
11----Somewhat gusty WSW winds in the afternoon.
12----Fair weather.
13----As yesterday.
14----Do.
15----Do.
16----Do.
17----⊤ NE quadrant in the afternoon.
18----⛈ NE, ⛈° SSW in the afternoon.
19----Cloudy weather.
20----p°, near ⊤ in the afternoon.
21----Somewhat gusty SE winds in the afternoon.
22----⌒ in the afternoon.
23----Coloration of clouds at sunrise and sunset; p°, somewhat gusty NW winds in the afternoon.
24----Slight coloration of clouds at sunset.
25----⊤ NE, NW in the afternoon.
26----⛈ NE quadrant, ●° in the afternoon.
27----⊤ N quadrant, d in the afternoon; ●° at night.
28----≡ in the morning; ⚡° S, ● at night.
29----⛈° NE in the afternoon; ⚡ NW in the evening.
30----Cloudy weather.
31----Overcast.

DAILY GENERAL REMARKS.

1----Cloudy weather.
2----⊤ N quadrant 3.25 p.
3----Cloudy weather.
4----⛈ E quadrant ●° in the evening.
5----⛈ S quadrant in the afternoon; ↯ N in the evening; ● at night.
6----●°, near ⊤ in the morning; ⛈ NNW in the evening.
7----Overcast.
8----Cloudy weather.
9----⛈° S quadrant in the afternoon; ⛈° N quadrant, ↯ various points in the evening.
10----● in the afternoon and at night; ⛈° W quadrant, ≡° in the evening.
11----Overcast.
12----Heavy thundershowers, coming from the S quadrant, in the evening.
13----⛈ NE quadrant in the evening.
14----⊤ S quadrant in the afternoon; ● in the evening.
15----d, ⛈ WNW early in the morning; ○ in the morning and afternoon; ⛈ SW quadrant in the afternoon.
16----Coloration of clouds, thundershowers, coming from the S quadrant, in the evening.
17----● in the early morning; ⛈° SE quadrant, ↯ NW quadrant in the evening; ●² at night.
18----○² in the forenoon; d° in the afternoon; ⊤ E quadrant in the evening; ● at night.
19----⊤ SE quadrant, ● in the morning; ⛈ various points in the evening.
20----● at night.
21----↯ N quadrant in the evening.
22----⛈° SE quadrant 2.25 p.
23----⊤° S quadrant, d in the afternoon.
24----⊤ E 1.50 p.; ↯ NNW, E in the evening.
25----● in the forenoon and afternoon; ⊤ E, WNW in the afternoon.
26----Overcast.
27----Near ⛈ SE quadrant, ● in the afternoon.
28----⛈° NW quadrant in the evening; ● at night.
29----Overcast.
30----⊤ E quadrant in the afternoon.

DAILY GENERAL REMARKS.

1----d° in the early morning; ⛈° NE quadrant, d° in the afternoon; ⛈ NW quadrant in the evening.
2----○°, ⛈° N in the afternoon.
3----⛈ SE quadrant, d° in the afternoon; ↯ NW quadrant in the evening.
4----p° 2.30 p. m.
5----●, ⊤ NE and SW quadrants in the afternoon.
6----●, ○° in the morning; ⊤ NE quadrant in the afternoon.
7----Cloudy weather.
8----Somewhat gusty WSW winds in the afternoon.
9----●° early in the morning; ↯ NW quadrant in the evening; ● at night.
10----●° in the early morning.
11----d° in the afternoon; ●° at night.
12----● in the morning and at night.
13----⊤ E, NE, S, ●° in the evening.
14----○ in the afternoon; d° in the evening; ● at night.
15----Somewhat rainy weather.
16----● in the morning and at night with gusty SWly winds.
17----Rainy weather in the morning and afternoon with somewhat gusty SSW winds veering to WSW.
18----As yesterday.
19----Gusty SWly winds at intervals with ● in the early morning and at night.
20----Rainy weather, especially at night with gusty WSW winds in the morning; ⊤° N 2.25 p. m.
21----Rainy weather, especially in the early morning with gusty WSW winds.
22----● in the morning and afternoon with gusty WSW winds.
23----Gusty SWly winds at intervals with ● or d.
24----●° at night.
25----●° in the morning and at night.
26----d early in the morning.
27----d in the forenoon; ● at night.
28----●° in the morning, afternoon and at night; with some gusty SWly winds.
29----Squally and rainy weather, especially in the morning.
30----Squally and rainy weather, ⊤ S quadrant in the morning; d° in the afternoon.
31----● in the morning; ●° in the afternoon and at night.

DAILY GENERAL REMARKS.

1____Somewhat rainy weather; ☈ SE quadrant in the morning and afternoon; ☈ SW quadrant in the afternoon.

2____● or d in the morning; d° in the afternoon.

3____d, ⌒° in the morning; ● and gusty SWly winds in the afternoon.

4____Somewhat rainy weather.

5____d in the morning and evening.

6____●° in the morning; somewhat gusty SW winds in the afternoon; continuous ● at night.

7____● in the early morning and afternoon, with somewhat gusty SWly winds.

8____As yesterday.

9____Somewhat gusty SW winds in the forenoon, afternoon and evening; d in the afternoon; ● at night.

10____●°, T° E in the early morning; somewhat gusty SWly winds at intervals.

11____Somewhat rainy weather especially early in the morning with gusty SWly winds; ☈ NE quadrant in the morning.

12____●° in the early morning; somewhat gusty SWly winds in the afternoon.

13____Somewhat gusty SW winds in the afternoon and evening; ● at night.

14____d° in the morning and afternoon.

15____Gusty WSW winds in the afternoon and evening.

16____Somewhat squally and rainy weather in the morning; ● in the evening.

17____● in the evening.

18____●°, T E quadrant in the afternoon; ☇ N quadrant in the evening.

19____T E, d in the afternoon; heavy thundershowers at night.

20____d° in the morning and afternoon; ● at night.

21____T E and somewhat gusty SWly winds in the afternoon; ☇ N in the evening.

22____●° early in the morning; convergence of Ci. toward N in the afternoon; ☇ N in the evening.

23____Somewhat gusty SWly winds in the afternoon.

24____Some ● in the morning, afternoon and at night; ☈ N 8.25 a. m.

25____● and somewhat gusty SWly winds in the morning and afternoon.

26____Gusty SWly winds with some ● in the morning and afternoon.

27____●° in the morning; ● in the afternoon.

28____● in the afternoon; ⌒° and coloration of clouds at sunset.

29____d° at noon; p° 5.15 p. m.

30____● in the morning.

31____● in the morning and at night; ⌒ in the afternoon.

DAILY GENERAL REMARKS.

1----⌒, ⊤ E in the afternoon; ↯ N, d in the evening.
2----● at night.
3----d° in the early morning; d in the afternoon and at night; gusty SWly winds in the forenoon, afternoon and evening.
4----Gusty Wly winds at intervals with some ● in the early morning and at night.
5----Gusty SWly winds at intervals with some ●.
6----d° in the early morning; somewhat gusty SWly winds in the early morning, forenoon and afternoon.
7----Somewhat gusty WSW winds in the afternoon.
8----Somewhat gusty WSW winds at intervals.
9----Rainy and somewhat squally weather; ⊤ N and E quadrants in the morning, ⊤ S, N in the afternoon.
10----Rainy weather especially in the afternoon, with gusty SWly winds in the morning.
11----● in the early morning, afternoon and at night; gusty SWly winds in the forenoon and afternoon; ↯ W in the evening.
12----● in the early morning.
13----●° at night.
14----Coloration of clouds at sunset.
15----d° in the afternoon; somewhat gusty Wly winds at intervals.
16----● in the early morning and afternoon; gusty SWly winds in the morning.
17----d° early in the morning; somewhat gusty SWly winds in the forenoon and afternoon.
18----↯ W in the evening; ●° at night.
19----d° in the early morning; ⊤ N 1.30 p. m.
20----⛈ NE quadrant, ⛈° S quadrant, ● in the afternoon.
21----●° 5.20 p. m.
22----⊤ E in the afternoon; coloration of clouds at sunset; ↯ NNE in the evening.
23----⛈ NE, d° in the afternoon; ↯ NW in the evening.
24----⛈ N, ● in the afternoon; coloration of lower clouds at sunset; ↯ N in the evening.
25----Overcast.
26----Coloration of clouds at sunrise; ⊤ S in the afternoon.
27----⛈ NE quadrant, ● in the afternoon; ↯ NNW in the evening.
28----d° in the morning.
29----Thundershowers in the afternoon; ↯ NW in the evening.
30----↯ W in the evening; ● at night.

DAILY GENERAL REMARKS.

1----d in the early morning; ⊤ E in the afternoon; ⚡ N in the evening.

2----⛈ NE quadrant in the afternoon.

3----⛈° E quadrant in the forenoon; ⚡ NW quadrant in the evening.

4----d° early in the morning; ● in the forenoon and afternoon.

5----d°, ⊤ N and E in the afternoon; ● in the evening.

6----● early in the morning and afternoon; ⛈ N in the afternoon.

7----Coloration of upper clouds at sunset; ⚡ NNW in the evening.

8----⊤ N quadrant, ● in the afternoon.

9----⌒, ⊤ E in the afternoon; ⛈ N quadrant in the evening.

10----⊤° W quadrant in the evening.

11----d° in the forenoon; ●° in the afternoon.

12----d in the early morning and afternoon; ● at night.

13----●° in the morning, ● in the afternoon with gusty SWly winds.

14----Rainy and somewhat squally weather in the morning and afternoon.

15----≡° in the morning; gusty WSW winds at night.

16----Cloudy weather.

17----As yesterday.

18----Do.

19----d 2.30 p. m.

20----●° in the afternoon.

21----⊤ E in the afternoon.

22----Cloudy weather.

23----●° in the afternoon.

24----Cloudy weather.

25----As yesterday.

26----○° in the morning; convergence of Ci. toward E in the morning and afternoon.

27----Fair weather.

28----Cloudy weather.

29----d° 1.10 p. m.

30----Cloudy weather.

31----d° in the morning; d, ⛈ N quadrant in the afternoon.

DAILY GENERAL REMARKS.

1----●° early in the morning.
2----p° in the afternoon.
3----Coloration of upper clouds at sunrise; ●, ↯ N quadrant in the afternoon.
4----● in the forenoon; d in the afternoon.
5----≡° in the morning; ● in the afternoon.
6----● in the afternoon.
7----Overcast.
8----● in the forenoon and afternoon.
9----Cloudy weather.
10----● in the forenoon and afternoon.
11----Somewhat gusty E winds in the afternoon.
12----Fair weather.
13----Overcast.
14----Coloration of upper clouds at sunset.
15----d at night.
16----d, p° in the morning; convergence of Ci. toward W in the afternoon; coloration of clouds at sunset.
17----Cloudy.
18----As yesterday.
19----p° 11.10 a. m.
20----⌒², ● in the morning; ⊤° 2.30 p. m.
21----Somewhat gusty Nly winds in the morning and afternoon.
22----d in the afternoon.
23----Overcast.
24----Somewhat gusty NE winds in the afternoon.
25----≡° in the morning.
26----d° in the morning.
27----● 9.25 a. m.; d°, ⌒ in the afternoon; coloration of clouds at sunset.
28----Cloudy.
29----As yesterday.
30----Do.

DAILY GENERAL REMARKS.

1----Fair weather.
2----As yesterday.
3----Cloudy.
4----d° in the afternoon.
5----● in the afternoon.
6---- p in the afternoon.
7----Cloudy.
8----● in the forenoon.
9----d in the forenoon; ●° in the afternoon.
10----p 1.20 p. m.
11----● 6.25 a. m.
12----Fair weather.
13----p° 11.50 a. m., p 1.10 p. m.
14----Overcast.
15----●° in the afternoon.
16----● in the forenoon and afternoon.
17----Overcast.
18----● in the early morning and afternoon.
19----Overcast.
20----d° in the morning.
21----∞ in the forenoon.
22----T° NE quadrant in the afternoon.
23----●° in the afternoon.
24----d° in the afternoon.
25----Somewhat gusty NE winds, convergence of Ci. toward SE in the afternoon.
26----Cloudy.
27----●° in the evening.
28----●° in the early morning and afternoon.
29----Cloudy.
30----Overcast.
31----As yesterday.

GENERAL SUMMARY FOR 1913.

MONTHLY AND YEARLY RESULTS OF METEOROLOGICAL OBSERVATIONS FOR 1913 AND COMPARISONS WITH THEIR NORMAL VALUES.

Month.	Atmospheric pressure.

Introduction 5

First and second class stations:

- Tagbilaran (II) 9
- Surigao (II) 21
- Cebu (I) 33
- Iloilo (I) 45
- Ormoc (I) 57
- Tacloban (II) 69
- Capiz (II) 81
- Calbayog (II) 93
- Legaspi (I) 105
- Atimonan (I) 117
- Ambulong, Tanauan (II) March to December 129
- Paracale (II) 139
- San Isidro (II) 151
- Dagupan (I) 163
- Bolinao (II) 175
- Baguio (I) 187
- Vigan (II) 199
- Tuguegarao (II) 211
- Aparri (I) 223

Third class and rain stations:

- Jolo (III) 237
- Zamboanga (III) 240
- Davao (III) 243
- Cotabato (III) 246
- Cagayan (III) January to October 249
- Butuan (III) 252
- Dumaguete (III) 255
- Yap (III) 258
- Maasin (III) 261
- San Jose Buenavista (III) 264
- Cuyo (III) 267
- Borongan (III) 270
- Masbate (R) 273
- Romblon (III) 276
- Laoang (III) January and February 279
- Batag (R) March to December 280
- Gubat (R) 283
- Sumay (III) 286
- Calapan (III) 289
- Virac (III) 292
- Nueva Caceres (III) 295
- Batangas (III) 298
- Santa Cruz (III) 301
- Antipolo (R) 304
- Iba (III) 307
- San Fernando (III) 310
- Echagüe (III) 313
- Candon (R) 316
- Laoag (III) 319
- Santo Domingo (III) 322

Annual summaries for first and second class station 1913 325

INTRODUCTION.

In this volume (Part III) of the report of the Weather Bureau for 1913 we publish the meteorological observations made in the various stations which at present constitute the meteorological service of the Philippines, a service established by Act No. 131 of the Philippine Commission May 22, 1901.

In Part II of the report for 1902, pages 52 to 60, will be found a detailed account of the establishment and organization of these branch stations and a list of the instruments with which they are equipped, according to their class.

The report of the various observers are carefully collated and examined at the Central Observatory, but it is evident that the Directors cannot assume the full responsibility for the accuracy of these observations. As every meteorologist knows, in observations of this kind much must be left to the conscientious care of the observer. Hence, while we take this opportunity to express our confidence in our observers, we think it proper to subjoin the following list, which gives some particulars about the stations and also the names of the observers who are primarily responsible for the accuracy of the observations in this volume (Part III) of the Annual Report of the Weather Bureau.

SECONDARY STATIONS AND OBSERVERS OF THE WEATHER BUREAU.

Town.	Province.	Island.	North latitude.		East longitude.		Observer.	Class.

REMARKS.

The hours of observations at the first and second class stations are 2 a. m., 6 a. m., 10 a. m., 2 p. m., 6 p. m., 10 p. m.; at the third and fourth class stations, 6 a. m. and 2 p. m. The time used is that of the one hundred and twentieth meridian east of Greenwich.

The barometer readings are reduced to sea level and 0° C., but no correction has been applied to eliminate the effect of gravity depending on the latitude of the place of observation.
